

## VIEWS OF THE SOLAR SYSTEM 2000

Brimming with facts, scientific theories, and comprehensive resources that bring planetary science to life, Views of the Solar System 2000 is the definitive virtual textbook.

**Recommended for Ages 7 and up**, Views of the Solar System 2000 presents a vivid multimedia adventure unfolding the splendor of the Sun, planets, moons, comets, asteroids, and more. Discover the latest scientific information, or study the history of space exploration, rocketry, early astronauts, space missions, and spacecraft through a vast archive of photographs, scientific facts, text, graphics and videos. Views of the Solar System offers enhanced exploration and educational enjoyment of the solar system and beyond.

### CD-ROM INCLUDES:

- \* Windows/Mac Compatability
- \* Integrated Internet Links
- \* Solar System Screensaver for Windows
- \* QuickTime 4.0
- \* Adobe Acrobat Reader 4.0
- \* Netscape Communicator
- \* Over **1,000** photos, animations, & virtual reality simulations

- \* **A teacher developed user-guide** with lesson plans, activities, and projects on topics from comets to impact craters and micrometeorites to robotic spacecraft
- \* In-depth history of space exploration including space history, chronology of space exploration, chronology of solar system discovery, and spacecraft mission summaries
- \* The latest scientific information of planets, comets, and celestial bodies
